**Prosperity**

MAIN CROP

HYBRID SWEET CORN

**Outstanding for**

**HIGH YIELD**

with strong two-ear heavy producing tendency.

**ATTRACTIVE APPEARANCE**

with dark green husks and flags, light interior silks, bright yellow kernels. Husked ears are 8 to 8½ inches long, with 16 rows of deep narrow kernels.

**FLAVOR AND TENDERNESS**

with long holding ability which enables it to remain tender and sweet for many days.

Three years' extensive field trials by Corneli experts and by market growers, shippers, canners and freezers in the United States and Canada have proved the superior quality of this new hybrid. Other outstanding features are resistance to wind and lodging . . . protection of ears by tight husk with good tip coverage . . . adaptability to mechanical or hand harvesting . . . uniform maturity and good holding ability. Prime edible stage is usually reached 83 days after planting or about in season with Golden Cross.

And for an Early Harvest, the Ever Popular®  
**CORNELI'S GOLD RUSH**

This profitable, widely-used early hybrid matures about 10 days before the new "Prosperity," providing an extended harvest period when the two are planted together. Favored by market growers, shippers and canners for its earliness along with full size, uniform ears (8½ inches long, 12 to 14 rows), attractive appearance and exquisite flavor.

## Tomato—State Certified

Note: Certified means state certified. Keystone certified tomato seed is treated with dry new improved cerasan-packed in 1/4 boxes or 1#, 5#, 25#, or 50# sealed bags, at no extra charge.

Georgia Requirements: If seed is for the production of plants in Georgia, it must be certified and orders marked "For Georgia Plant Growing" and written up for us to ship direct to the Georgia consignee so that, we may notify Georgia officials and comply with their regulations. Only varieties marked "GA." in the preceding list have been registered for plant growing in Georgia.
